

# Enabling a data-driven decision making with Microsoft Power BI.

Microsoft Power BI is a cloud-based, self-service business intelligence tool that will enable you to analyze data through highly visual and interactive reports and dashboards.

Systema Solutions' Power BI services can help you to:

- 1) Provide experienced BI consultants to deploy and manage your Power BI implementation.
- 2) Customize reports in Power BI to help you to perform the analysis that you need.
- 3) Assist your end-users in adopting to a new way of reporting and analyzing data using Power BI.

# Analyze your data no matter what type or source.

Microsoft Power BI integrates with a wide range of data sources. You can connect Power BI to your applications or data sources from:

Microsoft  
Access

Microsoft  
Excel

Microsoft  
SQL Server

Microsoft  
Exchange

Azure Blob Storage or  
Table Storage

Microsoft  
Dynamics  
Business Central

Microsoft  
SharePoint  
Lists

Google  
Analytics

Salesforce

OData

MySQL

# Enable a data-driven culture in your organization

Microsoft Power BI empowers your people with tools to help them use your business data to make better decisions. It will help you to:

**Gain complete insight** into your organization's overall performance with instant access to dashboards, KPIs and real-time company data.

**Fast track the decision making** process with the ability to easily publish and share interactive reports from any device, anytime, anywhere.

**Create accountability** with thorough reports and align business activities to your strategic goals with the ability to confidently track progress.

Access your business data from a single place, allowing your staff to increase productivity and efficiency and promoting better collaboration.

# Working with Systema Solutions

---

We are proud of the positive impact we make to our clients and their business.

At MiniBulk, we take pride in being able to analyze and assess our business using key metrics. The truth is that pulling all of the needed data points and compiling them with tools like pivot tables takes a significant amount of time and personnel resources. In a SME, these resources are valuable and efficiency is important.

Systema Solutions worked with us to understand our key reporting tools and implemented real-time reporting using Power BI. Now, at any time we can gain insight into trends in opportunities, sales and forecasted revenue with the click of a mouse. We also have transitioned our operational metrics to Power BI, enabling us to make quicker, more insightful decisions on inventory planning, purchasing strategy and trends. Since Systema Solutions supports us on MS Dynamics as well, having their help with the Power BI implementation provided a seamless, holistic solution.

Jody Lockhart  
General Manager | MiniBulk
