

Connect your business to drive productivity & profits with
Microsoft Dynamics Business Central

Supercharge your growing business with an all-in-one solution.

Microsoft Dynamics 365 Business Central is a comprehensive solution that helps SMBs connect their financials, sales, services, and operations to streamline and secure business processes, improve customer interactions, and make better decisions.

Connect your business.

Connect your people and processes with a single, unified solution so you can get more done using the tools you're already familiar with.

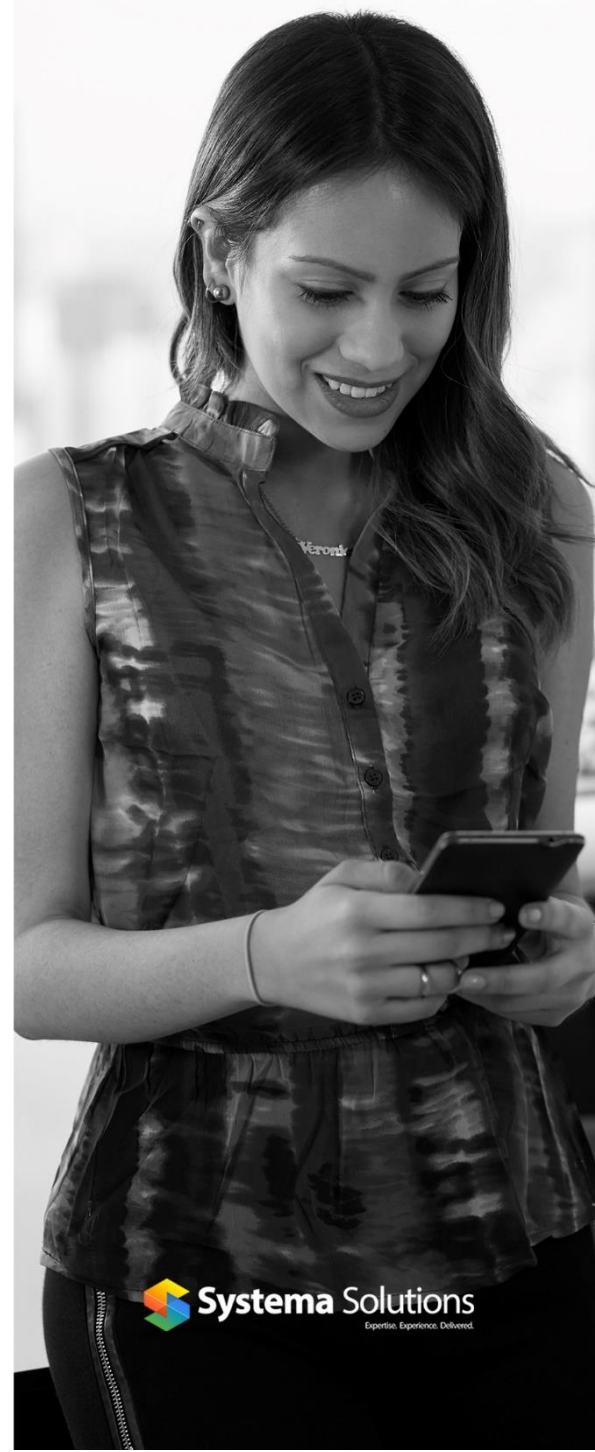

Make smarter decisions.

Easily analyze and share data with your teams to inform decisions and improve customer service. Get an end-to-end view of your business with reliable financial reporting and guide teams to optimal outcomes with predictive analytics and AI.

Trust in a secure, flexible system

Keep your data secure and ensure compliance with industry and financial regulations. Trust in a solution that helps maintain compliance and secure financial, customer, and personal data—all while delivering a 99.9% uptime service level agreement.

Run your entire business with a single solution using Dynamics Business Central.

Growth is stalling because your systems and processes can't keep up.

Streamline business processes with a single, comprehensive solution.

1. **Automate tasks and improve workflows** across accounting, sales, purchasing, inventory, and customer interactions with a business management solution that is deeply integrated with Microsoft 365.
2. **Accelerate the quote to cash process** by quickly acting on sales-related inquiries, managing service requests, and processing payments—all from within Outlook.

Decisions are being made based on intuition, not factual data.

Make smarter business decisions.

1. **Centralize data** from finance, sales, service, and operations to get an accurate view of your entire business.
2. **Optimize inventory levels** by using built-in intelligence to predict when and what to replenish.
3. **Improve financial reporting** with seamless Excel integration and advanced analytics from Power BI.
4. **Increase sales** by focusing on the right opportunities and responding quickly to customer inquiries.

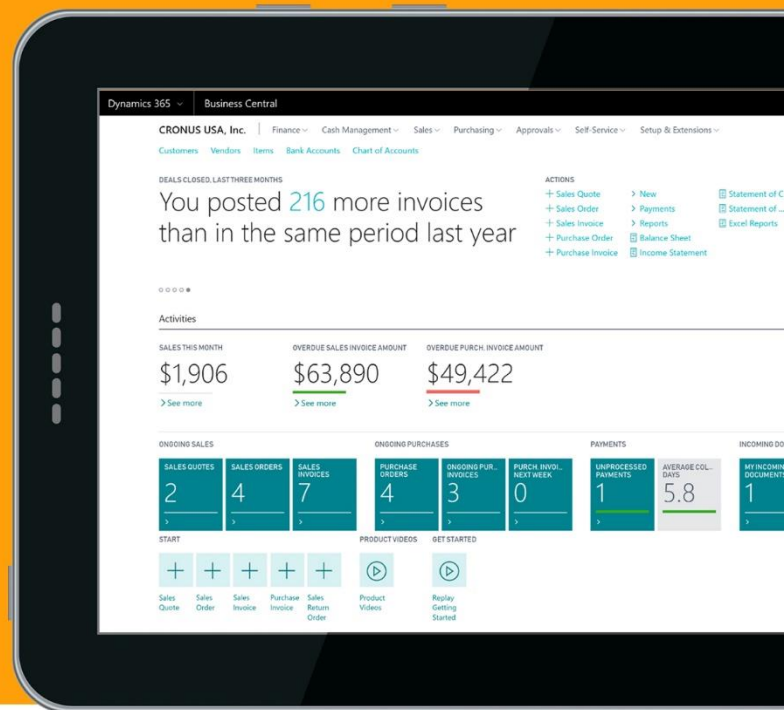

Data security and compliance are at risk.

Trust in a secure, flexible solution.

1. **Secure business processes** and ensure audit trails with easy-to-create workflows and controls to secure purchasing, credit authorization, and vendor payment processes.
2. **Handle, store, and transmit data** securely across your systems while protecting it from unauthorized access with automatic Microsoft datacenter encryption.
3. Start with what you need and **grow at your own pace** by adding capabilities and other Dynamics 365 solutions over time.
