

# CLOUD VS ON-PREMISES

Which is the right ERP deployment for you?

## CLOUD

## ON-PREMISES

### INVESTMENT

Software and implementation service fees only.

Upfront software and hardware investment, annual software maintenance costs, server and rack space management.

### LICENSING

Subscription-based, per-user licensing for cloud-based deployment.

Perpetual per-user licensing for both hosted and on-premise deployment.

### CUSTOMIZATION

Has an acceptable level of customization but not as deep as a typical on-premises environment.

Deep customizations can be accommodated via .NET/MVC.

### SECURITY

Relies on the most secured cloud platform in the market as it is hosted in Microsoft Azure.

Relies on your IT team's security skills to ensure the safety and confidentiality of your financial and customer data.

### UPGRADES

Automatic upgrades performed in the background, without having to pay for separate fees.

Need to keep up with annual software maintenance costs.

# 96%

of enterprises prefer to use cloud-based accounting systems than on-premises.
